EDUCATION

University of Toronto

HBSc. Statistics Specialist, Economics Major, Mathematics Minor

Expected May 2027

Toronto, Ontario

- **Relevant courses:** Statistical Methods for Machine Learning, Regression Analysis, Time Series Analysis, Probability Theory, Bayesian Statistics, Econometrics, Multivariate Data, Financial Economics, Corporate Finance, Differential Equations

PROFESSIONAL CERTIFICATIONS

CFA (Chartered Financial Analyst)

Level I Candidate (November 2026)

Toronto, Ontario

January 2026 - Present

TECHNICAL SKILLS

Languages: Python, Java, SQL, STATA, R Studio, Excel VBA

Libraries: Pandas, Numpy, Sci-kit Learn, TensorFlow, Keras, SQLite, statsmodel, seaborn, Matplotlib, Plotly

Tools & Technologies: SaaS, Google Cloud Platform, Azure, VS Code, Power BI, Tableau, Microsoft Office (Excel, Word, PowerPoint)

EXPERIENCE

Data Analyst - Cards Analytics & Insights

Royal Bank of Canada

Sept. 2026 – Dec. 2026

Toronto, ON

- Use **SQL** in **Teradata** to extract and join cards and account-level data - credit (Visa/Mastercard), debit, and core banking records - supporting analytics for Personal Banking
- Develop Power BI dashboards on cards portfolio metrics for management, reducing reliance on ad hoc data pulls
- Scope an independent analytics project modelling account state transitions as a Markov chain to characterize customer movement between [e.g. active, dormant, attrited] states

Research Assistant

University of Toronto - Advised by [PHD Candidate - Ian Zhang](#)

June 2026 – Present

Toronto, ON

- Reviewing literature on geographic generalization of deep-learning downscaling models (CNN/U-Net/diffusion architectures, spatial-statistics-aware training objectives)
- Scoping a project on semivariogram-based regularization to improve out-of-region spatial-dependence preservation

Risk Consultant Intern

KPMG

May 2022 - August 2022

Hanoi, Vietnam

- Quantified valuation-related risks by calculating asset over/understatements from price/quantity discrepancies and translating impact into NAV basis points (bps) for risk management
- Analyzed large datasets using Excel VBA to streamline data processing, enabling faster detection of risks and improving report accuracy, reducing processing time by **30%**

PROJECTS

Forecasting Dow Jones Excess Return

python | pandas | statsmodel | ARIMA | yfinance

- Analyzed Dow Jones excess returns using Python, applying **stationarity testing (ADF)** and **ARMA modeling** to financial time-series data
- Selected an **ARMA(2,2)** model via systematic **AIC grid search** and validated fit using Ljung-Box and heteroskedasticity diagnostics, confirming white-noise residuals
- Produced **predictive models using 2-step-ahead forecasts** for Nov-Dec 2025 with **95% prediction intervals ($\pm 8\%$)**, capturing realized returns within bounds
- Compared predicted vs. actual excess returns, reporting **forecast errors of 0.22 percentage points**
